

Eco-Tuff Deck Coating Infrared Reflective Colors

NOTE: The colors shown are actual photographs of our IR (Infrared Reflective) deck coating colors applied to wood planks. Apply a minimum of two coats or apply our Eco-Tuff Primecoat and one Deck Coating topcoat. A fine barefoot friendly aggregate is infused to provide a lightly textured surface. Use this chart only as a reference guide as print or monitor viewing will vary. We recommend applying our 2 ounce sample colors to verify actual color results.
