

Eco-Tuff Floor Coating Colors

NOTE: The colors shown are actual photographs of our standard high strength fade resistant floor coating colors applied to concrete tiles. Anti-fade infrared reflective colors are optional. Apply a minimum of two topcoats after applying our Eco-Tuff Primecoat when installing on unsealed and profiled substrates. Decorative flakes, non-skid aggregates, metallic pigments, or Eco-Tuff Clearcoats may be applied over the coating to add various decorative or safety features. Use this chart only as a reference guide as print or monitor viewing will vary. We recommend applying our 2 ounce sample colors to verify actual color results.
